Jordan Johnson

jordan.johnson@datastream.io | 555-010-0002

SUMMARY

High-throughput backend engineer and distributed systems specialist with 7 years architecting fault-tolerant microservices handling 20,000+ RPS. Proficient in Go, Python, Kafka, and PostgreSQL.

CORE COMPETENCIES

Backend: Python, Django, Go, gRPC, RESTful APIs, Spring Boot

Data & Infrastructure: PostgreSQL, Redis, Apache Kafka, Elasticsearch, Docker, AWS

EXPERIENCE

Staff Backend Engineer | DataStream IO | Feb 2020 - Present

Designed and launched distributed event streaming pipeline using Kafka and Go, processing 50M daily events with 99.99% uptime. Reduced infrastructure costs by $350K per year.

Backend Developer | NexaSoft | Jun 2017 - Jan 2020

Built asynchronous worker clusters with Python, Celery, and Redis to process large-scale background ETL pipelines.

EDUCATION

B.Tech in Computer Engineering | Massachusetts Institute of Technology | Graduated 2017
