SUMMARY

Results-driven Senior AI Architect and Machine Learning Engineer with 8 years of experience building scalable data pipelines and deploying deep learning models. Highly collaborative and team-oriented leader who mentors junior developers and drives cross-functional initiatives to increase revenue.

SKILLS

Programming: Python, SQL, Java, C++

Frameworks: PyTorch, Keras, Scikit-Learn, Pandas

Infrastructure: AWS, GCP, Docker, Kubernetes

EXPERIENCE

Senior AI Architect | Google | Jan 2018 - Present

Led a cross-functional team to deploy a massive deep learning recommendation engine using PyTorch and Kubernetes on AWS, resulting in a 15% increase in user engagement.

Innovated a novel data pipeline utilizing SQL and Apache Spark to process terabytes of data daily.

Machine Learning Engineer | Startup Inc. | Feb 2015 - Dec 2017

Developed predictive models using Python and Scikit-Learn. Collaborated with product managers to deliver data-driven solutions.

EDUCATION

B.S. Computer Science | MIT | Graduated May 2014
